TALENT MAXIMIZATION

FOR GAME-CHANGING RESULTS IN A VUCA WORLD

by Prof. Dr. William Rothwell

In a Volatile, Uncertain, Complex and Ambiguous (VUCA) world, time is a precious commodity. There is limited time to recruit, develop and engage people. Organizations mostly do not have the luxury to pursue long-term plans for people when business conditions can change with a snap of the fingers.

Leaders must be prepared to maximize their talent - meaning they must be able to get the highest productivity from their people in real time while also developing and engaging them in real time. Leaders often may not know how to do that, or they feel it is not possible to get maximum results from their people whilst also engaging, developing, and cultivating them to encourage retention and preparing for bigger responsibilities.

This session examines cutting-edge and best practices to help you maximize your talent and get the best from people in real time in a VUCA world.
